

## **HOW TO MAKE MONEY FROM NOTHING !!!**

What if you could **use your computer to key in any figure you wanted** into other people's accounts as a loan to them and then demand that they pay back this money - **created from nothing** – with interest on top.

**If this sounds like a dodgy scam** – then be prepared for a shock. For this is exactly how private banks **make money from nothing** – by just keying figures into customer accounts. For when you take out a loan from a private bank what you are really doing is giving the bank permission to **create the very money you borrow from nothing** – after which then claim it as theirs – and demand you to give it back to them at interest!

**To add insult to injury** - if loans that private banks use to 'make money from nothing' turn out to have been too risky, then governments **spend billions or even trillions of pounds of our money to bail these banks out**. The banks on the other hand, begin to **hoard** their money – no longer lending to individuals, small business or even to each other, but raising bank charges and interest rates and refusing mortgages.

Crazy, isn't it?

**YET THERE IS AN ALTERNATIVE – SEE OVERPAGE!**

Today a totally unquestioned MYTH dominates all economic thinking. This is the myth that a government's spending power depends either on raising taxes or borrowing from Big Banks. As a result of this myth both the media and politicians of all parties peddle a BIG LIE. This is the lie that the only way of reducing our 'national debt' is through massive cuts in public spending and in people's incomes, pensions, public services, benefits etc.

In fact the real reason our country's debt is so high is because – like other countries – it long ago surrendered a basic national right to international bankers. This is the right of a nation to directly create and issue its own publicly created money instead of (1) borrowing money from private bankers and (2) using public money not just to pay off the ever-spiralling interest on our debt to them - but also spend trillions to bail out the Big Banks!

*Yet THE TRUTH IS that if private banks both can and do create MONEY FROM NOTHING (see overpage) then so could states and governments - not as debt but as debt-free money and without borrowing from private banks.*

**END BAILOUTS AND BONUSES FOR BANSTERS!!!**

**CREATE DEBT-FREE MONEY FOR THE PEOPLE!!!**

**FIGHT TO FREE YOUR NATION FROM DEBT-SLAVERY  
TO THE INTERNATIONAL BANKS!!!**
